

Dear Larbert West,

Warmest greetings from SOS families!

It is a pleasure for me to greet you and thank you for your continuous support! I am delighted to tell you about the progress of your sponsored child, made during the year and to express how much I appreciate your help.

A Hard-Working 12th Grader

Priya is currently in the 12th grade. She is preparing for her Central Board Examinations.

She always works hard to get good grades. "I know how important education is to go far in life so I always give extra efforts to do better". She is even attending tuition classes for Mathematics and Biology to upgrade her grades.

Her diligence doesn't go unnoticed by her teachers who always sing praises of her hard work. She is improving a lot this year, especially in Chemistry.

I am sure that if she works as hard as she is doing now, she will graduate from her high school with flying colours. Even when she

has any doubt, she always asks her teachers or her SOS mother for help.

She loves her school. Please know that your generous contribution is changing this girl's life.

Wishing you a Merry Christmas and a Happy New Year on behalf of the entire SOS family!

Warm regards,

Maalika Chadha

National Sponsorship Co-ordinator
